

YOUNG BFAS

The youth of today

At this second young BFAS meeting, foot and ankle oriented residents and early started foot and ankle surgeons will present their scientific activities.

They will discuss some clinical problems they felt underthought about.

New generations bring new technologies for example online consultations, but is this a good evolution?

Program

- 9:00 Homemade Coffee + Introduction

Research

-9:05 Correction of ankle varus deformity using supramalleolar osteotomy assessed by a Autogenerated measurements.

Arne Burssens

- 9:15 Morphometric assessment of syndesmotic ankle lesions using WBCT
